

Window Teller

4 Price Window Vending System

This window water vending unit is easily installed into a window, wall or kiosk. The unit is coin operated, makes change and is easy to use. The self-serve system gives your customers 24 hour a day access to your fresh drinking water, 365 days a year. The lockable cash box, located in the cabinet, can only be accessed through a lockable rear cabinet door located inside your premises. This gives you three layers of security!

Features:

- 4 Selection Buttons. Easily field programmable for both volume and price.
- Solid state electronic controller.
- LED readout for total money deposited.
- PLC controlled vending operation.
- Pause button, stops vend to change bottles if required.
- MDB coin mechanism, accepts all Canadian and American coins and makes change. Other currencies available.
- Stainless steel construction.
- Large stainless steel filling area, accommodates insulated coolers.
- Post carbon filter, takes standard 10" carbon block filter.
- 5 GPM ultra violet sterilizer.
- UV temperature flush feature. Flushes for 3 seconds if no water has been sold for 1 hour.
- Sold out mode—Will not accept money if UV bulb doesn't operate or if you run out of feed water.
